

## Quality Policy

Magnitude Security is a specialised provider installing, servicing and maintaining industrial electronics, security, CCTV and associated control systems.

Magnitude Security has created and implemented a quality management system in line with the requirements of ISO 9001:2008. As such, the organisation is committed to complying with the requirements of customers and ISO 9001:2008, as well as requirements it sets for itself. It also commits to continuously improving the effectiveness of its quality management system.

The primary aims of Magnitude Security are to:

1. Provide a consistently high quality product supported by high standard services.
2. Commit to practices based on continuous improvement.
3. Maintain a financially strong and progressive business.
4. Maintain an attractive and rewarding work environment that encourages a stable and conscientious work force who are committed to a high level of product quality and customer relations.

Magnitude Security has established quality objectives at relevant levels and functions of the organisation, which are set out in the current objectives and targets register. It reviews these objectives for achievement and the setting of future objectives at its management review. This policy is also reviewed for continuing suitability in that forum.

A handwritten signature in black ink, appearing to read 'B. Witt'.
